2026 ENVIRONMENTAL POLICY

Date: January 2026

Jet2 plc is an organisation that takes its environmental impact seriously. Over the last decade, our efficient flying programme, waste reduction scheme and electrification programme have helped to reduce our impact, but we know there is much more to do.

In 2021 ***Jet2.com & Jet2holidays*** launched our ***Jet2*** *journey to net zero* by 2050 through our sustainability strategy. Since then, the Group has continued to implement its sustainability strategy with the ambition to decarbonise its business quicker than 2050.

To support this aim, ***Jet2's*** environmental policy ensures we will continue to conduct business in an environmentally responsible manner and will comply with all legal environmental requirements and other relevant guidelines in all regions in which it operates. ***Jet2*** is committed to environmental protection, improving environmental performance and minimising environmental degradation and pollution by:

- Providing leadership from the Chief Executive Officer and the Board on environmental issues and improving the management of environmental risks at senior levels of the business.
- Promoting a positive environmental culture throughout ***Jet2***, our supply chain, contractors and overseas partners.
- Pursuing innovative technologies and adopting robust strategies to minimise the impact of ***Jet2*** environmental footprint.
- Implementing environmental management techniques consistent with the principles of international standards to minimise adverse environmental impacts and continually improve our environmental performance.
- Reducing the use of natural resources and energy and using what we do need more efficiently
- Reporting on our progress and performance regularly
- Consulting with stakeholders on environmental issues
- Reducing emissions, releases and waste
- Creating environmental awareness within the business and industry
- Continually monitoring and reporting on our performance across key metrics.

Jet2 is acting in the air, on the ground and in resort to tackle its environmental impacts with initiatives ranging from investing in sustainable aviation fuels and purchasing renewable energy, to switching to lower impact products. Full details of our Jet2 Sustainability Strategy 2024 – 2035 can be found on the Jet2 plc website (Sustainability Centre). The responsibility for overseeing the implementation and annual review of this environmental policy lies with the Head of Sustainability.

This environmental policy applies to all business areas of ***Jet2*** with responsibility for the environmental performance extending to all colleagues across the business. All colleagues must act in an environmentally responsible manner and report any environmental incidents to the Head of Sustainability.

Signed: 
Name: David Neill

Position: Chief Sustainability and Corporate Affairs Officer
